Newsletter DecoRad® - introduction Floormate, UV curing used at water regulatory authority and more...

Dear relation,

Via this newsletter we keep you up to date on developments in the field of accelerated drying and curing.

After an extensive period of development, testing and field trials the DecoRad® Floormate is ready for the market.

The DecoRad® Floormate in short

The DecoRad® Floormate is the ultimate tool for instantly curing floor coatings. The DecoRad® Floormate can instantly cure approximately 250 square meter per hour (depending on the type of basefloor, layer thickness and product).

About the DecoRad® Floormate

UV has been successfully used in industrial applications for instantly curing inks, car paints, adhesives and coatings. Due to DecoRad® Systems many years of experience in using UV on-site in combination with coatings, paints and oils, the DecoRad® Floormate has arisen.

OTHER NEWS:

UV curing used at water regulatory authority

Schults Schilders from Zierikzee (NL) used UV-curing for stairs and floors as one of the first Dutch maintenance companies. This technique is successfully being used in industrial applications, but little on-site.
