

Where the Handmate UV600 is supporting the Floormate for corners, edges and other difficult to reach areas the Handmate UV1800 can also be used for tables, shower trays, counter tops, balconies and of course when there is a need to cure a lot of stairs. With the 7 inch bulb it is easy to cure with an overlap without having the risk of missing a spot. This lightweight, easy to use piece of equipment can be plugged in everywhere. Unique is that the Handmate UV1800 can operate with a power input between 110 and 250V. As with all the DecoRad devices the Handmate UV1800 has a self-diagnostic system with display-notifications.

Handmate UV1800

Benefits of UV Floor curing

- The object can be used straight away
- Eco friendly lacquers
- Minimal inconvenience
- Industrial quality
- Easy to clean

UV coating and equipment

Worldwide formulators develop their UV curable coatings with DecoRad UV equipment. A matching UV formulated coating results in an industrial quality finish. A proper how-to-operate & safety training is required and is provided by DecoRad or one of our local partners. DecoRad offers a complete range of on-site UV curing equipment including handhelds and accessories. Fast growing markets are resilient and line-marking.
