

## Quick Guide Handmate UV600

Always wear personal safety gear (UV facial shield, gloves and UV protective clothes)

Unprotected bystanders: keep 6 meter distance !

Warning: The bottom of the lamp unit becomes hot!

The DecoRad HandMate UV 600 has a power cable of 60 centimeters. Connect the power cable to an extension cord.

Mains/outlet: 200 – 250 V / 50 – 60 Hz  
Fuse: 10 – 16 A

Standard with small handle  
(optional) extension handle

Connect the extension handle to the lamp unit

Connect ( careful ) the data cable of the extension handle to the back of the lamp unit

Press the ( power ) **ON** button  
The indicator light will burn

On the display of the lamp unit the text **COOL** will be shown

Press the button with the **lamp symbol** in order to start up the UV lamp.

On the display of the lamp unit the text **WAIT** will be shown  
The UV lamp needs 60 seconds to warm-up

When **DIM** is shown in the display, the HandMate UV 600 is ready to use

Use the button on the lamp unit or the extension handle to start UV curing  
The shutter opens  
On the display of the lamp unit the text **FULL** will be shown

Full power UV can only be used in the safe range of 2 – 10 centimeters to any surface

**DIST** shown in display = distance to surface is not correct / unsafe, a beeping signal can be heard and the shutter closes.

Move the lamp unit in a position between 2 – 10 centimeters from the surface

Switch off the UV lamp to end curing .  
The text **COOL** will be shown.

Leave the HandMate UV 600 connected for min. 1 minute to cool down. Leave the HandMate UV 600 for 2 minutes to cool  
Press the (power) **OFF** button

**IMPORTANT !**  
ALWAYS cool a HOT UV lamp  
NEVER start up a HOT UV lamp.
